## Not for Profit Organizations and Charitable Giving

Our attorneys have particular expertise in the laws governing charitable giving and not-for-profit organizations, including family foundations. We have been consulted by leading cultural and educational institutions. Additionally, our attorneys serve on the boards of numerous charities and private foundations. We assist clients in attaining their charitable objectives while obtaining the maximum tax benefits available, be it through the use of charitable remainder trusts, charitable lead trusts, charitable gift annuities, partial interest contributions, private foundations or donor-advised funds. We advise clients as to their fiduciary obligations and the tax considerations involved in the creation and operation of family private foundations.
