IP Transactions and Licensing

Recognizing that for many companies intellectual property represents their most important asset, we provide comprehensive business, legal and technology counsel that enables our clients to maximize the value of their IP assets.

We help clients across all industries monetize and assess the proper value of their IP. Our team partners with clients to license, sell and acquire IP assets, and structure IP-driven strategic alliances and joint ventures. Both operating companies and private equity firms looking to acquire or invest in IP frequently turn to us to conduct due diligence and value IP portfolios. We also counsel research organizations and spin-out companies on tech transfer agreements and other licensing matters.

We understand the business motivations of our clients, which combined with our lawyers' in-depth technical and industry knowledge, enables us to craft legal solutions to accomplish our clients' business goals.
