Mergers, Acquisitions and Joint Ventures

For us, it's not just about getting deals done. It's about the future of your business.

With experience in virtually every type of M&A transaction and structure, we know that the deal at hand is more than just a deal. It's your business's future. And it's hinging on complex business and legal issues that require a multidisciplinary approach. And yet we know too that the world – and your operations – don't get put on hold while the deal comes together.

We approach every transaction with this in mind, whether it's a billion-dollar merger, a high-profile acquisition, or a joint venture. It's why we've developed processes that enable seamless cooperation between lawyers across our extensive team, from our tax, employee benefits and executive compensation, intellectual property, financial restructuring, energy and environmental practices, to our CFIUS and litigation groups – to name just a few.

Our clients include public and private companies of all sizes; some of the world's largest private equity and hedge funds (and their portfolio companies); leading investment banks and other financial institutions; and boards of directors and various special committees. We've done deals in industries as diverse as aerospace and defense, real estate, financial services, FinTech, insurance, education, manufacturing and apparel, as well as a range of different technology transactions.

From start to finish, we've guided these clients through significant add-on acquisitions, leveraged buyouts, auctions, club deals, portfolio company acquisitions and divestitures, tender offers, going private transactions, joint ventures, hostile transactions, and distressed acquisitions, among others.

Our work is comprehensive, creative and always commercially minded. Because for us, it's not just about the deal. It's about the big picture.
