Tax Compliance & Controversy

As an integral part of our corporate, private funds, real estate and financial restructuring teams, our tax lawyers leverage our wide-ranging experience in sophisticated matters to provide creative and thoughtful advice in a multitude of areas.

Whether advising a large corporation, family office or high-net-worth individual, our team develops tax-efficient strategies that help our clients accomplish their goals while minimizing their tax exposure.

In partnership with our corporate and private funds teams, we advise on matters including mergers, internal corporate restructurings, fund formations and private equity transactions. We also work on structuring complex onshore and offshore funds for U.S. and non-U.S. investors in a variety of asset classes.

Our real estate work includes advice on the tax implications and structuring of a variety of deals, and we are well-versed in REIT formation and REIT transactions. Our multidisciplinary team is at the forefront of the rapidly evolving Qualified Opportunity Zones program, helping our clients navigate regulatory changes in real time as this complex landscape continues to come into focus.

Additionally, we advise U.S. and non-U.S. entities on structuring their real estate investments to mitigate exposure to tax and filing obligations relating to UBTI and FIRPTA.

We also collaborate with our financial restructuring team on high-profile reorganizations and workouts, equity and debt financings, and restructurings.
